

Please respect the following steps as the final result also depends on how you take care of your tattoo:

1. Remove the plaster after 2-3 days.
2. Wash the tattoo immediately **only** with your bare hand (and a **neutral** soap) under lukewarm water and remove the rest of ink, blood and serum.  
Pat the tattoo gently with a paper towel.  
Don't use any fabrics!
3. Now you can start applying a thin layer of ointment 3 - 4 times a day.  
You can use *Bepanthen* or a similar creme **without** any perfumes or alcohol.  
Keep your tattoo moisturized!  
After a few days some dark crusts will start to peel off.  
Never pick or scratch them off!

The tattoo should have completely healed after **1 month**.  
Please cream it for this entire duration.

Also keep in mind during the healing process:

- Never scratch a healing tattoo!
- Don't go swim or sauna!
- Don't expose it to strong sun rays!
- Protect your **healed** tattoo with at least SPF 30!

If you have any questions or concerns, please don't hesitate to send me an email!
